

### 3K 208g/m<sup>2</sup> PAN Fabric

1. Technical description:			
		Unit	
1.1. Mass per unit area		g/m <sup>2</sup>	208 ± 10 (6.1oz/yd <sup>2</sup> )
1.2. Width		mm	1000 (without fringes)
1.3. Thread count		yarns/ cm	5.1 x 5.1 ± 0.25
1.4. Fiber description	Warp weft		3K HT-Carbon fiber <sup>1</sup> 3K HT-Carbon fiber <sup>1</sup>
1.5. sizing content <sup>2</sup>		%	1.2 ± 0.5 % (type 40B / 309)
1.6. Weave			twill
1.7. Distortion (local)		%	< 2
<p><b>Grafil TR30S</b>  <sup>2</sup> Compatible with epoxy resins; Toray: type 40B; Cytec: type 309.</p>			
2. Form of delivery:			
<p>Width: 1000mm (without fringes).            Board core: 150mm inner diameter; max width 1300 mm.            Roll length: 350 -0/+10m.            No joints allowed (short rolls max 10% per delivery: multiple of 70 m).            For every lot-nr, a sample of ~1m<sup>2</sup> will be added to the shipment for inspections.            The fringes should have a length of 5±1 mm.</p>
